

Understanding Chemistry Form 1 Learners Book, is created to support a competence based curriculum framework and present an alternative approach to the more traditional texts written for Form 1 learners. No matter which specification you choose to follow, this work (book) provides comprehensive coverage of all the content you need to know. This first edition has been written to reflect the latest developments in the subject and new specifications for Chemistry. Understanding Chemistry is divided into three parts, Topics, Subtopics and Specific Competencies. A diverse range of real world context provides the delivery mechanism for a course. This indispensable guide presents a thorough and engaging approach to Chemistry.

Written by experienced teachers who are also consultants in Chemistry.
